

In our technical department we have the following vacancy

Head of Electromechanics 100% (m/f/d)

Your tasks

- Leading the technical team and deputizing for the CTO
- Regular work and shift planning and monitoring
- Development and implementation of testing and preventive maintenance programs for electronic devices and PLC controls, with a focus on safety devices
- Rapid generation of reports in the event of deviations and ensuring 100% coverage of interventions in the maintenance management tool (GMAO)
- Planning, checking and coordination of all work under your responsibility
- Analysis of device failures and implementation of suitable solutions
- Coordination of all maintenance activities at our various locations (CH/FR)

Your profile

- Bachelor's degree or similar in a technical field and 10 years of operational experience in a similar role
- Fluency in at least one of the languages French, German, English - and good language skills in one of these languages
- Knowledge of monitoring software (e.g. PC Vue, WinCC, RCMS), Siemens and ABB PLCs and drives
- Management experience in leading a team of technicians (at least 5 years)
- Strong analytical, technical and organizational skills
- Availability outside regular working hours (e.g. on-call duty) and in possession of a valid category B driving license
- Good IT skills (Word, Excel, PowerPoint etc.)

The Swissterminal Group, headquartered in Frenkendorf, is a provider of integrated logistics services. Swissterminal operates efficient terminal facilities, depots and ports for combined container transport by barge, rail and lorry at five locations in Switzerland and three locations in France.

In addition to terminal activities and container transport, the service portfolio also includes barge transport, warehousing, storage, trading and the maintenance and repair of containers, as well as securing cold chains and customs clearance.

The international logistics company DP World has held shares in Swissterminal since January 2020.

We are looking for qualified, team-orientated candidates who have set themselves the goal of working in a modern, innovative and future-oriented company. If you are not fazed by hectic situations and have a customer-orientated, competent manner, we look forward to receiving your application.

Send your application by e-mail to
